BIO BOTTLES MADE IN THE NETHERLANDS

Tacx

BIO BOTTLES MADE IN THE NETHERLANDS

Tacx Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

Made in THE NETHERLANDS

- Bio Degradable
- 100% Recyclable
- Safe for Food Use

WHAT IS UVC GERMICIDAL LIGHT?

UVC wavelengths are between 250 and 280 nanometers, making them germicidal – meaning they are capable of inactivating microorganisms, such as bacteria, viruses and protozoa.

HOW DOES UVC LIGHT WORK ?

The high energy from short wavelength UVC light damages the DNA of bacteria and viruses thereby preventing replication and ability to infect.

OUR UVC DISINFECTION PRODUCT RANGE

All our UVC products are mercury free and hence environmental friendly. Our products have been tested to be effective in disinfecting 99.9% bacteria such as E. Coli and Staphylococcus.

"ORCA is found in Antarctica and Arctic oceans. Also called 'Killer Whales', it is the largest of the Dolphin family. They are beautiful, intelligent, fast, strong and yet the most social of all sea animals! They are said to have great tolerance in varying temperatures. That is the reason they enjoy world-wide distribution. Most interestingly, it's the only species in the world that has both the male and the female offspring stay with their mothers and immediate family forever...!"

These wonderful creatures have inspired us to bring to you exclusive polos. Their 'killer look', beauty, sheen and lustre is attributed to the MERCERIZING process. The premium cotton rich material makes it extremely comfortable in all climatic conditions. The collar, cuff in the birdie configuration sets new standards in their making. The bold loop stitches all over the hems and shoulder make them unique and yet resilient. Finally just as the ORCA, this polo will stay with you for long time to come.

Shouldn't then it be called the ORCA POLO?"

BIO BOTTLES MADE IN THE NETHERLANDS

Tacx Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

UV protection fabrics are rated between UPF 25-39. Ultraviolet protection factor(UPF) measures blockage of UV-A and UV-B rays. A UPF rating of 25-39 means that our fabric allows 1/25th to 1/39th (2.56- 4%) of UV radiation that falls on the surface of the fabric to pass through it. Thus, 96-97.4% of UV rays are not allowed to reach your skin thereby protecting the skin from sunburn and long term skin damage.

Break out from the routine of standard basic designs, & embrace the new Corporate Fashion Polo; Introducing Greberry by **SANTHOME**

The Grey Berries (of Greberry fame) around the shoulder & on the collar infuse the subtle design aspect without being loud.

UV protection fabrics are rated between UPF 25-39. Ultraviolet protection factor (UPF) measures blockage of UV-A and UV-B rays. A UPF rating of 25-39 means that our fabric allows 1/25th to 1/39th (2.56- 4%) of UV radiation that falls on the surface of the fabric to pass through it. Thus, **96- 97.4% of UV rays are not allowed to reach your skin** thereby protecting the skin from sunburn and long term skin damage.

"ORCA is found in Antarctica and Arctic oceans. Also called 'Killer Whales', it is the largest of the Dolphin family. They are beautiful, intelligent, fast, strong and yet the most social of all sea animals! They are said to have great tolerance in varying temperatures. That is the reason they enjoy world-wide distribution. Most interestingly, it's the only species in the world that has both the male and the female offspring stay with their mothers and immediate family forever...!"

These wonderful creatures have inspired us to bring to you exclusive polos. Their 'killer look', beauty, sheen and lustre is attributed to the MERCERIZING process. The premium cotton rich material makes it extremely comfortable in all climatic conditions. The collar, cuff in the birdie configuration sets new standards in their making. The bold loop stitches all over the hems and shoulder make them unique and yet resilient. Finally just as the ORCA, this polo will stay with you for long time to come.

Shouldn't then it be called the ORCA POLO?"

GSM or GMS ?

Most manufacturers confuse clients with this. GSM: Grammes per sq. meter is the wt. of the fabric in a square of 1 meter x 1 meter. it remains the same in all sizes. Hence the correct way to describe GMS: is the wt. in grammes per piece of the Tee/Polo And will always vary with each size.

Thus, completely misleading. We ALWAYS specify the GSM. So you are rest assured of what we offer.

Heavier the better ?

Not necessarily. The quality of yarn will decide the quality and Price.

Super combed, combed, semi combed and carded: this is the quality of YARN in descending order.

We specify the yarn. So you are rest assured of what we offer.

What more we can offer:

Pierre Cardin
PARIS

Legendary French designer, fashion designer and innovator Pierre Cardin. As a graduated architect he started his career of fashion designer after the Second World War under the guidance of a renowned master in the field, Mr Christian Dior.

In 1950 he sets up his own fashion saloon and in 1953 he becomes a member of the prestigious French association Chambre Syndicale de la Haute Couture. In 1959 he starts a revolution in the field by creating a first collection in history directly produced for the sale and wearing "prêt-à porter". In this way he brings high fashion to the general public.

Besides textiles and accessories Pierre Cardin designs furniture, interiors, objects of applied arts & has also worked for automobile and aircraft industry and in other areas.

Since 1991 Pierre Cardin has held the position of honorary ambassador of UNESCO and since 2009 he has been a good will envoy of the FAO of the United Nations.

Pierre Cardin has received a number of awards and decorations of high degree from institutions all over the world. Since 1977 he has several times been given De d' Or" (golden thimble), the largest honor of French haute culture. Pierre Cardin was the first fashion designer in history to win, in 1992, a chair in the French Academy of Fine Arts (Academie des Beaux-Arts).

The collection of original Pierre Cardin products has been carefully produced from selected materials and created with the emphasis on detail and attractive design.

History shows that Pierre Cardin is not only a fashion trademark, he is also a symbol of timelessness.

eco-neutral Bamboo eternity pencil replaces your traditional wooden pencil. Traditional wooden pencils write only up to around 200 metres, but this bamboo eternity pencil, has a writing length of up to around 20,000 metres using a graphite tip to produce a graphite line. Not only does it write like a pencil, but the markings can be erased. It works by leaving a graphite line on paper just like a regular traditional wooden pencil but it wears down so slowly, that it should outlast up to 100 traditional wooden pencils!

PRESENTING A WALLET THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

SANTHOME SECURITY FOR YOU

How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency Identification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

PRESENTING A WALLET

THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Frequency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

UV protection fabrics are rated between UPF 25-39. Ultraviolet protection factor (UPF) measures blockage of UV-A and UV-B rays. A UPF rating of 25-39 means that our fabric allows 1/25th to 1/39th (2.56- 4%) of UV radiation that falls on the surface of the fabric to pass through it. Thus, 96-97.4% of UV rays are not allowed to reach your skin thereby protecting the skin from sunburn and long term skin damage.
